PROFILE SUMMARY

Currently pursuing a Bachelor of Technology in Information Science and Engineering, with strong interests in software development, data analytics, and intelligent systems. Eager to apply technical skills and hands-on project experience to real-world problems, while continuously learning and contributing to innovative, technology-driven solutions.

PROFESSIONAL EXPERIENCE

ARAVIND EYE HOSPITAL, PUDUCHERRY

06/2025 – 07/2025 | Puducherry, India

Healthcare Tech Intern (Hospital IT & Medical Records)

- Worked closely with hospital IT and medical records teams to understand clinical workflows and deploy practical patient-facing digital solutions.
- Built a QR-code indoor navigation system using React.js and Tailwind CSS mapping 4 core clinical wings to alleviate patient wayfinding confusion.
- Analyzed medical record physical location movements, identified systemic workflow bottlenecks, and implemented structured file-tracking protocols.

UPTURNE SOFTWARE & SERVICES

06/2026 – 07/2026 | Puducherry, India

AI Automation Intern (Pulsebay Coworking)

- Gained hands-on exposure to web application development, AI automation workflows, and real-world software engineering practices.
- Collaborated with engineering mentors on live production projects, applying structured Git versioning and rapid prototyping.
- Participated in time-bound hackathon activities, developing collaborative problem-solving, algorithmic thinking, and rapid delivery skills.
- Strengthened technical foundations across modern web frameworks, workflow automation logic, and cross-functional team delivery.

ZOHO CORPORATION

11/2023 | Puducherry, India

Zoho Creator Student Trainee (Young Creators Program)

- Completed hands-on training in Zoho Creator low-code development platform under Young Creators Program.
- Constructed structured database schemas, automated workflow notifications, and custom analytics dashboards.

CORE TECHNICAL SKILLS

Languages:	Python, Java, SQL (MySQL), R Programming
Web & Frameworks:	React 19, TypeScript, JavaScript (ES6+), Vite, Tailwind CSS, Flask (Python Web), HTML5/CSS3
Data & Libraries:	Inverted Indexing, TF-IDF, Vector Space Model, Cosine Similarity, Pandas, NumPy, Scikit-Learn
Tools & Platforms:	Git, GitHub, Vercel, Netlify, Zoho Creator, Microsoft Power BI, Advanced Excel, MySQL Workbench

VERIFIED SOFTWARE PROJECTS

1. SMART INDOOR NAVIGATION SYSTEM

06/2025 – 07/2025 | Production Deployed

Technologies: React.js, Tailwind CSS, QR Code Wayfinding, Netlify, Mobile-First UI/UX

Live Demo: aravind-map-raesha0506.netlify.app | GitHub: Smart-Indoor-Navigation-System

- Problem: Elderly and outpatient visitors faced frequent confusion navigating multi-story hospital corridors, overburdening front-desk helpdesks.
- Solution: Engineered a mobile-first QR-activated indoor wayfinding web system with verified floor routing, zero app-store install, and photographic landmarks.
- Result: Mapped 4 core clinical wings (Glaucoma, Pharmacy, Refraction), delivering sub-1.5s mobile load and deterministic route orientation.

2. IR SEARCH ENGINE v2 (INVERTED INDEX & TF-IDF)

2024 – 2025 | Open Source

Technologies: Python, Flask, HTML5 Templates, CSS3, Inverted Index, TF-IDF / VSM, Vercel

Live Demo: search-engine-self-sigma.vercel.app | GitHub: search-engine

- Problem: Searching unstructured document corpora lacked computational transparency and required heavy external database setups.
- Solution: Built a lightweight Python/Flask Information Retrieval engine with Inverted Index tokenization, TF-IDF weighting, and Cosine Similarity scoring.
- Result: Delivered deterministic relevance ranking across multi-document corpora with real-time inspectable term calculation matrices and zero database dependencies.

3. INTERACTIVE EDITORIAL PORTFOLIO

2025 – 2026 | Production Deployed

Technologies: React 19, TypeScript, Vite, Tailwind CSS, GSAP, EmailJS, Vercel

Live Demo: myportfolio-five-alpha-63.vercel.app | GitHub: My_Portfolio

- Problem: Static portfolio templates fail to convey real system architecture, interactive simulator capabilities, and responsive execution.
- Solution: Engineered an editorial web application featuring live in-browser wayfinding & IR search sandboxes, 100% fluid responsiveness, and EmailJS dispatch.
- Result: Achieved 100% responsive fluid layout across 320px–1440px viewports, verified touch targets, and document-accurate interactive resume folio.

EDUCATION

Bachelor of Technology in Information Science and Engineering (B.Tech ISE)

2023 – 2027 | Puducherry, India

WOMEN'S ENGINEERING COLLEGE (Constituent College of Puducherry Technological University)

Core Coursework: Programming Foundations, Data Structures & Algorithms, Database Management Systems (DBMS), Object-Oriented Programming (Java/Python), Web Technologies, Machine Learning & AI, Cloud Computing.

CERTIFICATIONS & CREDENTIALS

- Tech Intern Certificate — Aravind Eye Hospital, Puducherry (Clinical IT & Medical Records System, 2025)
- AI Automation & Web Development Certificate — Upturne Software & Services (Pulsebay Coworking, 2026)
- Zoho Creator Platform Certification — Zoho Corporation Young Creators Program (2023)
- Python & Data Structures Specialization — Academic Distinction & Lab Excellence (PTU Affiliate, 2024)
